## **DETAILED ACTION**

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over lura et al(5,617,312) in view of Dunthorn(5,317,140).

lura et al disclose a method and an apparatus for inputting information including coordinate data comprising a camera(100) mounted on top of a display device(202), an object extracting device(106) for extracting a predetermined object and recognizing the shape of the predetermined object(column 3, lines 59-67), a motion detector device(107) for detecting a motion of the predetermined object(column 4, lines 32-65) and for determining whether to input a predetermined information(column 5, lines 1-9). Iura et al substantially show all the feature of the above claims except for the "providing at least two cameras located at respective corners of a display" and "calculating angles of views of each of the at least two cameras for calculating the coordinates of the predetermined object". However, Donthorn is cited to show that the concept of utilizing at least two cameras located at respective corners of a display device(column 6, lines 5-37; column 7, lines 6-54) for determining a position of an object based on the viewing angles of the cameras(i.e., triangulation; column 7, lines 18-38). Thus, it would have

Art Unit: 2629

been obvious to one of ordinary skill in the art to modify the system of lura et al with the above noted teachings of Dunthorn such that to provide two cameras at respective corners of the display device (202) for determining the position of the object based on the viewing angles of the cameras because both references are related to determination of the position of an object based on feature extraction of the object by utilizing camres.

- 3. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.
- 4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Mike Fatahiyar whose telephone number is (571)272-

7688. The examiner can normally be reached on Monday-Friday from 9:30 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Richard Hjerpe, can be reached on 571-272-7691. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
